Shawn, I trust you have begun your well-deserved vacation in good fashion. This email message briefly updates you on the three points being managed by LCD [REDACTED], and Harbor Point.

[REDACTED]

[REDACTED]

Harbor Point: Work is progressing well at this point and monitoring has shown no impact from the pile driving activities. Photos of current site activities are attached. As a side note, Dan will be working with Bob Greaves to arrange an information briefing with Honeywell for August 14th. You will recall their interest to meet with you to discuss their redevelopment plans at other facilities in the region.
